Product Description:

The Rokit Water Rocket Kit is a precision water rocket used by schools and colleges throughout the world to demonstrate Laws of Motion. Attach the Rokit to a standard plastic fizzy pop bottle, part fill with water and use a cycle pump to power it for automatic launch! This exciting kit has the capability of providing repeatable experiments. Rokit flies to around 30 metres (100ft) which creates great fun in learning science - it's a valuable and visual tool for all levels of science education. Contents 3 Fins Bottle Screw Collar Collar O'Ring Rubber Nozzle Launch WirePressure Tube (with fittings) Rokit Stickers Assembly Instructions Manufacturer: Rokit Model: 8050 Water Rocket Kit
