Billings Wooden Ship Models

Product Name:

Norden

Product Movie URL:

Product Description:

The Billings Norden wooden ship model is an accurate reproduction of the real life vessels typical of the kind which was very commonly used along the Western coast of Denmark. This type of boat was originally designed by local boat builders in the villages of Klitmøller and Vorupar around 1930. It represented an improvement of the existing boats and has remained unchanged, except that the ship now is a few feet longer and has a closed wheel house. This wooden boat kit is ideal for the beginner. Manufacturer: Billings Model: B603 Norden Scale: 1/30
