Product Description:

The Parkzone P-51D Mustang, "Ferocious Frankie", offers incredible scale details, such as exhaust pipes on the nose and a realistic-looking pilot figure. It's more than you'd expect from a RTF, but everything you'd expect from Parkzone. You won't need anything to get the Parkzone Mustang up and into the air. Everything that's needed to fly is included in the box, including the FM transmitter, batteries, and a variable rate DC peak charger! Outstanding flight performance and exciting warbird realism await you, with the Parkzone P-51D Mustang, you get it all! Manufacturer: Parkzone Model: PKZ1500 P-51D Mustang Colour: Ferocious Frankie Click Here to view details of the Hobbyzone & Parkzone Warranty. More about the Parkzone P-51D Mustang As the most successful fighter of World War II, the P-51D Mustang still thrills thousands of people today in air shows and races around the world. Now park flyer fans can experience Mustang thrills on a smaller scale with this fully aerobatic Charge-and-Fly reproduction from Parkzone. And getting it airborne is about as simple as it gets. Just attach the wing and tail, connect the battery to the charger, and in as little as 40 minutes, you're flying. The Parkzone Mustang allows you to choose between two flight modes, selectable via the transmitter. Flight mode A limits the amount of control surface travel for the more inexperienced pilots. Once you have mastered Mode A, you can switch to Mode B which grants an experienced pilot maximum control surface movement for high-energy Mustang manoeuvres, such as loops, victory rolls, Cuban-8's, and more. The P51 can be upgraded to a 3-cell Li-Po battery, and comes with three jumpers on the receiver - one for LiPo compatibility, one for use on a V-tail plane, and one for using Flight Trak. The electronics in the Mustang are top of the range, with a powerful 480 motor with gear reduction and reusable 27MHz proprietary radio system with receiver/ESC module, and separate 5-wire servo motors. More advanced park flyer pilots will be pleased to know that the Mustang's

receiver/ESC module and two servos can be removed and used in other speed 370 or 400-class electric aircraft. That list includes V-tails and delta wings, thanks to selectable control mixing in the receiver. The receiver is also equipped with an X-Port connector, but not an external port, and the speed control's auto-cutoff can be adjusted to work with 3-cell Li-Po battery packs. The Parkzone Mustang comes with authentic, factory-applied paint scheme and decals, complimenting the realistic scale appearance, features and flight behaviour. Can be flown in the park, or take it to a larger area for the full aerobatic capabilities of the superb R/C warbird to be unleashed.

Product Specification:

Parkzone PKZ1500 P-51D Mustang RTF Electric Specifications
Wing Span: 39.5 in / 1000mm
Overall Length: 34.0 in / 860mm
Flying Weight: 29.0 oz / 820g
Motor Size: 480 power with gearbox
Radio: Proportional 3-channel FM
Servos: Two removable 5 wire servos that along with Rx, can be used in other speed 370 or 480-class electric aircraft
Trim Scheme Colors: Silver fuselage with black and white invasion stripes, olive drab wing top and silver wing bottom
Prop Size: 10 x 8
Speed Control: Power FET proportional ESC/receiver
Recommended Battery: 9-cell 10.8V 1000mAh Ni-MH
Aileron: Proportional
Elevator: Proportional
Throttle: Proportional
Approx. Flying Duration: 15 minutes
Approx. Assembly Time: 10-15 minutes
Gear Ratio: 3:1
Transmitter Range: 2500 feet (762m)
Available Frequencies: 6 frequencies on 27MHz
X-Port: Equipped with X-Port connector, but there's no external port, so minor modifications will need to be made to the fuselage. We will have information up on the web soon about how to do this.
Charger: Variable rate DC peak - charges 5-10 cell Ni-MH batteries
Landing Gear: No
