Product Description:

The Tamiya 1/10 XB Mini Cooper is ready to run straight out of the box, this XB is a perfect introduction to the fun and exciting world of radio control car on-road racing. Set comes with all necessary R/C equipment including an Expec 2-channel transmitter and TEU-101BK electronic speed controller. This radio control car comes completely assembled and ready to run with the battery and charger included. Ready to Run

Classic Compact Style Despite being small in size, the Mini Cooper of the 1960's packed a big punch, taking on and beating the world's top racing cars in renowned competitions like the world rally championships, and the European and British touring car championships. Of course the Mini Cooper caused heads to turn not just on racing circuits, but with its compact and stylish design was a real attention grabber on the city streets. Now you can enjoy the much loved street model of the Mini Cooper as a fully assembled XB R/C car. Body comes finished in royal blue with white roof and classic white bonnet stripe. Front grille and bumper are reproduced using metal plated parts for a classy finish.

Front Wheel Drive M-03 Chassis The M-03 chassis features a front mounted motor for a full front-wheel drive chassis. 4-wheel independent double-wishbone suspension provides excellent handling, and a large hole designed into the middle of the chassis ensures vital weight savings. With a mid-battery layout, the M-03 features ideal weight balance for superb control and consistent cornering. Set includes trigger type transmitter and electronic speed controller for a complete ready-to-run set. Manufacturer: Tamiya Model: 57742 1/10 XB Mini Cooper
