Product Description:

The Tamiya XBG Ferrari F430 in 1/10th scale is one of the latest releases in Tamiya's XBG radio control car range. With its TNS-R XBG chassis this car will make any radio control enthusiast excited, boasting more power, better weight distribution and all-round improved performance, the Tamiya XBG Ferrari F430 TNS is perfect for XBG drivers wanting to make that next step in the world of radio control cars. Combined with the sleek Ferrari F430 body, this is sure to be the best-looking car on the track. About the Ferrari F430 Introduced at the 2004 Paris Auto Salon as the successor to the popular Ferrari 360 Modena, the F430 made quite a splash. While retaining a similar aluminum spaceframe chassis to the 360, the F430 features a tight and compact body that clearly exhibits the F-1 influence on Ferrari design. It has a new generation, 4.3 liter V8 engine with 490hp output, making it a truly supercharged road car. Impressive specs like a maximum speed of 189mph and 0 to 60 acceleration in 4 seconds flat round out the profile of this luxury supercar. Manufacturer: Tamiya Model: 43522 1/10 XBG Ferrari F430 TNS Scale: 1/10

Product Specification:

Tamiya XBG Ferrari F430 TNS Specification High powered OS FS-12SW engine with dual needle carburetor and recoil starter. Double deck chassis features reinforced aluminum lower and durable plastic upper decks. Features 4-wheel independent double wishbone suspension with long span arms for superior road hugging ability, while 4 oil dampers provide excellent shock absorption. Comes with Expec SP R/C unit housed in single box and trigger type transmitter. Highly reliable shaft driven 4WD transmission with F/R sealed diff gearboxes. Full ball

bearings ensure that high speed TNS chassis also features excellent running performance and stability. Durable and realistic pre-painted polycarbonate body. This car can utilize most TG10-Mk.1 Option Parts, greatly increasing customization choices.
