Product Description:

The Wilesco T90 Steam Turbine has made the live steam engine go into the new millennium. They are the successors of the traditional steam engines and replaced it more and more during the last decades. Turbines are used today in the aeronautics as well as in power stations. The first model of this range is mounted on a light-colored and printed base plate. A graph shows the course of the torque dependent on the speed and a manometer shows the pressure in the nickel plated boiler. Of course, Wilesco's accessories - which are of known quality - can be operated with the Steam Turbine T90. Finely painted metal base plate 12.5" x 10". Height, including smoke stack, 12.5". Weight: 5 lbs. Don't forget the Esbit Fuel and the Steam Oil! Manufacturer: Wilesco Model: T90 Steam Turbine
