

# Star Wars Millenium Falcon

Category:

Revell Star Wars Plastic Model Kits

Product Name:

Star Wars Millenium Falcon

Product Movie URL:

Product Description:

The Revell Star Wars Millenium Falcon is a plastic sci-fi model accurately recreating the motion picture starship. This plastic sci-fi kit does not require either paint or glue to complete so is perfect for young modellers. Even if the Millennium Falcon looks a little worse for wear, continuous modifications make it something quite special. A hyperdrive is installed inside the 27 m long heavily armoured spaceship and this gives it almost double the speed of any Imperial starcruiser. Its bank of sensors enables it to track down even very distant spaceships.
