Product Description:

With the Hornby Digital Mixed Goods Train Set you can really see the benefits of Digital Control once the set is assembled. Each of the two Hornby digital locomotives has a decoder factory fitted and are immediately ready for operation. Independent control is guaranteed for each loco even though they may both be on the same track. When the powerful diesel locomotive is coupled to the four wagons included with the set, the Class 08 diesel can then pull them round the circuit just stopping in front of the little 0-6-0 'Jinty'. The 'Jinty' can then be reversed carefully so that it couples to the front of the 08. Then by programming the engines to work in unison the double headed train can move off down the track. We would highly recommend the Hornby R1075 Mixed Goods DCC Digital Train Set. The set includes the following: R8217 Hornby TrakMat BR 0-6-0 Diesel Shunter Class 08 BR 0-6-0T Class 3F 'Jinty' Ore Wagon 6 Plank Wagon 'Wallace Spiers' BR 12ton Vent Van RMC Tanker Track: Starter Oval plus Extension Track Pack A (with point and buffer stop) New Hornby TrakMat Hornby Select Digital Control Unit Manufacturer: Hornby Model: R1075 Digital Mixed Goods Train Set
