

Digital Pendolino Train Set

Category:

Hornby Digital Train Sets

Product Name:

Digital Pendolino Train Set

Product Movie URL:

Product Description:

The Hornby Digital Pendolino Train Set is stunning with its four car Pendolino representative of Virgin Trains' latest 'state of the art' passenger rolling stock. The new Hornby four car digital model is ready to use straight out of the box. The large oval with two sidings ensures that there is plenty of track for the Pendolino to show off its accurate tilting mechanism especially when the train travels at speed around the bends. Each drive unit has lights that illuminates in the direction of travel but can, using the Hornby Select Unit, be independently switched on or off even when the train is in motion! The set includes a new Hornby TrakMat. We would highly recommend the Hornby R1076 Pendolino DCC Digital Train Set. Contents: Virgin Trains Class 390 4-Car Pendolino power car - motorised, power car - non motorised, standard buffet coach - non operating pantograph and standard open coach Track.Oval of track with two sidings, two points and two buffer stops New Hornby TrakMat Hornby Select Digital Control Unit Manufacturer: Hornby Model: R1076 Digital Pendolino Train Set
