Hornby Digital Train Sets

Product Name:

Digital GWR Western Pullman Train Set

Product Movie URL:

Product Description:

The Hornby Digital GWR Western Pullman Train Set really is the ultimate in digital train sets! A digital Castle Class locomotive, four Pullman cars, a Pannier tank plus wagons, add in the Hornby Digital Select Control Unit and you have more than a set, you have the makings of a really impressive model railway layout! The track configuration will allow the operator, using the Select digital unit, the ability to have the Pullman train running around the looped circuit while the 0-6-0 Pannier locomotive can be busy shunting the wagons around either of the two sidings. Or course, there can also be interaction between the two trains with the locomotives double heading and pulling all the Pullman cars and wagons in one long train. The set includes an R8217 Hornby TrakMat. We would highly recommend the Hornby R1077 GWR Western Pullman DCC Digital Set. Contents: Digital GWR Castle Class 'Whittington Castle' Locomotive Four Pullman 1st Class Parlour Cars GWR 0-6-0 Class 2721 Pannier Tank Ore Wagon 6 Plank Wagon 'Wallace Spiers' GWR 12ton Vent Van Track: Starter Oval plus Extension Track Packs A & B (with two points and two buffer stops) New Hornby TrakMat Hornby Select Digital Control Unit Manufacturer: Hornby Model: R1077 Digital GWR Western Pullman Train Set
