Product Description:

The Hornby R8214 Elite DCC Control Centre is the unit for those who wish to take their train control to a new and advanced level. The Elite is more than capable of answering the needs of most railway layouts - twin control with press switch function, 17 button keyboard, wide function LCD screen display, four amp power with facilities to accept up to six amps, the capabilities of registering 255 locomotive addresses as well as 255 accessory addresses (including point control), plus a USB portal for linking to a PC. The Hornby Elite is quite literally designed for the model layout that demands more control. Manufacturer: Hornby Model: R8214 Elite DCC Control Centre
