

Building Slip

Category:

Billings Wooden Ship Models

Product Name:

Building Slip

Product Movie URL:

Product Description:

The Billings Building Slip is designed to be used with wooden ship models up to 90 cm long. The notched keel support is screwed to the baseplate. Two guide blocks one permanent and one adjustable to match all sizes secure the positioning of the keel of the wooden boat kit. A wooden rod ensures that the foundation is stable. The middle piece (square) slides back and forth and is useful in positioning the frames at right angles. Manufacturer: Billings Model: B397 Building Slip
