Product Description:

The Revell Star Wars Slave I Easykit is a plastic sci-fi model accurately recreating the motion picture spacecraft. This plastic sci-fi kit does not require either paint or glue to complete so is perfect for young modellers. After an extensive refit the Slave I, a former patrol craft of the Firespray Class, served up until the Clone Wars as a transport for the bounty hunter Jango Fett. After his death his son Boba Fett, also a bounty hunter, used the Slave I, which had again been modified and completely repainted, in order to track down and capture his quarry.
