Product Description:

The Silverlit Acrobat 3D is a radio control plane offering you the capability of a more expensive 3-channel hobby R/C plane, for much less. The new Silverlit X-Twin Acrobat allows differential thrust, elevator and motor control. The elevator function allows you to perform loops and stunts, and turn in tight corners. Two independent speed controllers control the power of the two wing mounted motors, which are themselves powered by a 3.7v LiPo battery. The X-Twin charges direct from the transmitter, which requires 6 x 1.5v AA Alkaline Batteries. The X-Twin will fly for upto 10 minutes and can be charged and ready to fly again in less than 30 minutes. Silverlit produce the X-Twin Acrobat, like the whole range of X-Twin planes, from a lightweight impact resistant Expanded Polypropylene Foam for the best strength to weight ratio. The X-Twin Acrobat is available on three Bands, A, B and C, which allows you to fly upto 3 planes at once for fantastic aerobatic races. Comes completely assembled and ready to fly, everything is pre-installed, all you need is the 6 AA batteries. The Silverlit X-Twin is suitable for the novice flier, and is perfect as a fun toy for all the family or as an introduction to the hobby. Comes in an attractive new style Gift Box. Manufacturer: Silverlit Model: SE85658 X-Twin Acrobat 3D Plane Colour: Red, Purple or Blue

Product Specification:

Technical Specification Product Dimensions: Wingspan 315mm (12.5") Length 310mm (12.25") Product Weight: 26g including rechargeable Flight Battery. Flight Battery: High capacity 3.7v Lithium Polymer Battery. Charger: Integral Field Charger/Transmitter. Charging Time: 20-30 minutes for full charge. Intelligent charger incorporates LED charging indicator & auto shut off facility when battery is

charged. Flight Duration: 5-10 minutes. Plane will maintain height on low throttle. Batteries Required: 6 x 1.5v AA Alkaline Batteries for Transmitter/Charger. R/C Specification: Supplied completely assembled ready-to-fly, with pre-installed 3 Channel FM Digital Radio Control. Two independent speed controllers enable the two powerful wing mounted miniature electric motors to steer the model proportionally by simply moving the transmitter joy stick left or right, and allow full throttle control for climb or descent. Features exciting elevator function to perform loops and stunts, and turn in tight corners. Fly indoors in a large hall, or outside in calm conditions. Sophisticated wing design, for maximum stability for the inexperienced Pilot. Made of tough, flexible EPP Foam, to absorb impact from a heavy landing. Range: Up to 100m (300ft). Frequency: 27MHz. Split frequencies allow up to three different coloured models to be flown together on Bands A, B & C, comprising 2 of each colour/frequency. Instruction Manual: Included, providing helpful tips for the new X-Twin Pilot and experienced flyer. Ages: 8+. Adult supervision recommended.
