Product Description:

The Dragon 1/35 Tiger I Late Production (3 in 1 set) is a plastic model kit in the Dragon WW2 Military Plastic Models range. At the time of its introduction in August 1942, the Tiger I was the most potent and heavily armoured tank in the world. Weighing 57 tonnes and armed with a mighty 8.8cm main gun, it was a dangerous predator on any battlefield. During the course of its life, various modifications and improvements were made to various components. The Tiger I Late Production version, for example, was characterized by having steel road wheels instead of rubber-rimmed wheels of earlier vehicles, which is reflected in this plastic model kit. The Dragon Tiger I Late Production plastic model kit is the perfect addition to any WWII collection. Features: Newly tooled slide-moulded DS track with revised pattern Upgraded details on hull bottom delicately reproduced to look realistic New engine heater on rear plate is provided as option Newly designed exhaust shields with updated square bump details are highly realistic Updated escape hatch is workable with interior details Turret Multi-directional slide-moulded cupola with full details Cupola ring delicately reproduced with weld seams Two types of cupola ring available: with and without drainage slots Cupola w/ head pad ring and details Separate commander's hatch swivel arm Clear parts for individual periscope ports in cupola Two types of loader's hatch to suit different variants Loaders hatch can be assembled open/closed Loaders hatch with interior details Stowage bin can be assembled open/closed, complete with slide-moulded rivet detail on all bin faces Lock for stowage bin w/photo-etched parts One-piece slide-moulded turret Weld details finely reproduced on both sides of turret Two types of turret roof available to suit different variants Close defence weapon can be assembled open/closed Close defence weapon moulded in super detail: can rotate 360 degrees The three pilze (for final type roof) have a weld seam and drainage hole Accurate spare tracks w/separate and accurately moulded guide horns Detachable spare
