1/10 XB Mazda RX-7 Drift

Product Movie URL:

Product Description:

The Tamiya XB Mazda RX-7 Drift radio controlled car is perfect for drift race enthusiasts. This radio control car comes completely assembled and ready to run with the battery and charger included. Popularized by such movies as Fast and the Furious, the once amateur sport of drift racing now has a wide audience and professional race series. Following its release as an R/C assembly kit and R/C Expert Built models on the TT-01 chassis, Tamiya now brings you the XB Mazda RX-7 (FD3S) rotary-powered sports car on the drift-spec TT-01D chassis complete with LED lights to let you drift in style. Manufacturer: Tamiya Model: 57766 XB RX-7 Drift Spec Scale: 1/10

Product Specification:

About the Tamiya TA57766 1/10 Expert Built Mazda RX-7 Drift Spec: - Ready-to-Run R/C model of the Mazda RX-7 Drift Spec. - 4WD shaft driven bathtub TT-01 chassis with coil spring damped, 4-wheel independent double wishbone suspension and sealed front and rear differential gearbox. - Stylish aerodynamic shape of the RX-7 faithfully reproduced in durable polycarbonate and comes beautifully pre-painted. - Drift-spec modifications include special suspension tuning, full ball bearings, sport-tuned motor, aluminum heat sink, CVA mini shock dampers and short springs. - Silver, narrow mesh wheels with 26mm width are mounted with Drift Tire Type D, which feature a resin and rubber compound specially designed for long-lasting drift action. - Includes ESC (TEU-101 BK), type 540 motor, and Expec R/C System. - Includes LEDs for head and tail lights that turn on automatically when the car is switched on. - Add the TLU-02 Light Control Unit (ITEM 53937) for greater control of light operations. - Wide variety of tune-up parts are separately available to customize your machine.
