

# Neptune SB-1 Radio Control Submarine Kit

Category:

Radio Control Submarines

Product Name:

Neptune SB-1 Radio Control Submarine Kit

Product Movie URL:

Product Description:

With the Thunder Tiger Neptune SB-1 Radio Control Submarine kit, you can experience the miracles of the deep sea. Best of all, because it's a kit you can learn how this amazing submarine works as you put it together. The Neptune SB-1 is the first R/C submarine from Thunder Tiger, and its inspiration is taken from modern research submarines. The body is made from impact resistant ABS plastic, so this sub' is tough. It is also powerful, with a 12v motor propelling you at 2mph. And what would a submarine be if it couldn't go under the water? This submarine can really submerge upto 10 meters (operational depth 5m) using a static diving system, just like the real thing! And at over 2 and a half foot long, this high tech submarine will keep you entertained for hours. You also have full control! With command over depth and using the horizontal stabilisers to adjust your movements, you really are the Captain of this vessel. But don't worry about this getting out of hand, if the submarine detects a leak or loses your signal, it will automatically attempt to come to the surface before it's too late. The Thunder Tiger Neptune Submarine kit comes with almost everything you need to become a deep sea explorer, including most of the electrics, the only thing required is a 4 channel 40mhz radio and receiver. The Thunder Tiger Neptune Features: - RC submarine model - Impact resistant ABS Body - 12V motor - Static and dynamic dipping system - Ballast tank with filling and spring pump - Dynamic control over height and vertical stabilizers - Automatic surfacing with empty Akku, bad radio reception or leakage - 12V lead Akku in the scope of supply contain The kit version includes:- 2 x servos- Pump- Electronics and ESC- 12v led acid battery- Mains charger- All wiring and connectors The kit requires:- 4 channel 40mhz radio- 4 channel receiver Manufacturer: Thunder Tiger Model: TT5220K1 Neptune SB-1 Radio Control Submarine kit~

Product Specification:

TT5220K1 SB-1 Neptune Radio Control Submarine Kit Technical data: Displacement: 7,7kg over water, 7.95 kg under water Length: 774mm  
Trunk width: 290mm Depth: 200mm Height: 285mm Drive: 12V electrical motor Propeller: 40mm Speed: approx. 3km/h Normal submerged  
depth: approx. 5m max. submerged depth: approx. 10m
