

# Surface Mounted Point Motor

Category:

Hornby Power and Control Equipment

Product Name:

Surface Mounted Point Motor

Product Movie URL:

Product Description:

The Hornby Surface Mounted Point Motor in the range of power and control equipment is used for electronic operation of points. Designed to be positioned either side of any Hornby point, this surface mounted point motor allows for the convenient electrical operation of points. Maybe be used with the Hornby R8216 Digital Point / Accessory decoder or for DC analogue operation, the R044 Lever Switch. May not be suitable for use with points which are incorporated into certain track configurations. If in doubt consult the Hornby Helpline. Manufacturer:
