

# X-Twin DIY Advanced Radio Control Plane Set

Category:

Silverlit X-Twin Radio Control Planes

Product Name:

X-Twin DIY Advanced Radio Control Plane Set

Product Movie URL:

Product Description:

The X-Twin DIY Advanced Radio Control Plane Set has dramatic jet styling so this model is a real performer and is the perfect choice for the aspiring Top Gun pilot! The X-twins proportional power is provided by twin pusher electric motors with accurate steering created using differential thrust. This rc aircraft model requires straight forward assembly with full step-by-step instructions included. The high capacity 3.7 volt Li-Po flight battery is easily charged in around 20-30 minutes from the transmitter's built in charger and provides excellent flight duration. Available in a choice of three exciting colours and different 27MHz frequencies permitting up to three to be flown simultaneously. Requires 6 AA alkaline batteries for operation. Manufacturer: Silverlit Model: SE85780 X-Twin DIY Advanced Radio Control Plane Set
