Product Description:

The Silverlit Palm Z Radio Control Micro Jet is a Radio Control Plane in the Silverlit Silverlit Radio Control Planes range. Following the spectacular success of the Original Palm Z Indoor Biplane, that continues to be a firm favourite with indoor flyers all around the country, the new Infra Red Palm Z Micro Jet is sure to prove just as popular!...Undoubtedly one of the smallest Remote Controlled Aeroplanes in the World, with a wingspan of only 8.5" (210mm) and weighing just 10 grams, this tiny Indoor Micro Monoplane features a flashing red LED light and has a super smooth flying performance in a relatively small space. The Palm Z Radio Control Micro Jet is supplied completely assembled ready-to-fly, with a single powerful micro motor driving a geared pusher prop, it's made of flexible foam to survive the occasional collision with the furniture. Lightweight, safe and easy to fly up to three together on Bands A, B & C using rudder and proportional motor control, for formation flying with your friends!...Featuring a fast charging facility for fabulous long flight times, the Lithium Polymer flight battery will provide fantastic flights of ten minutes or more between charges, yet can be recharged in just fifteen minutes with the portable charger provided. Manufacturer: Silverlit Model: SE85718 Palm Z Micro Jet Colour: Three Styles
