Product Description:

The Revell Shelby GT Convertible 2008 Blue is a diecast model car in 1/18 scale. The Shelby GT 500 was officially exhibited at the Detroit Motor Show in 2006 and went on the market in 2007. The car has a 5.4 litre V8 supercharged engine that develops 500 bhp. The vehicle has a six-speed gear box, a tuned chassis, 18 inch wheels and Brembo brakes. The car was developed with an eye on the 1967 GT 500. With the new Shelby GT the motor sport legend Carroll Shelby, together with the Ford special vehicle team (SVT), have again developed a high performance super class sports car that is also the most powerful Mustang of all time. Add this die cast model car to your collection today!
